Bio-Therapeutic
TECHNOLOGY ACCELERATED SKIN CARE™

From microcurrent pioneer Bio-Therapeutic comes a revolutionary new facial toning technology that delivers the ultimate in skin fitness, with professional grade lifting and firming in the convenience of a rechargeable, handheld unit. Our patented, preprogrammed Suzuki Sequencing, the result of 50 years' experience as the leader in microcurrent technology, energizes the skin and safely stimulates the facial topography into a more firm, lifted appearance.

The unique, patent pending K4iTEK™ self tensioning probe system allows for application with just one hand, providing a precise, comfortable lifting pressure that's extraordinarily simple to use.

Unique to Bio-Therapeutic, four independently controlled energy pathways and ultra pure martensitic stainless steel probe heads deliver the superior coverage previously seen only in our professional models.

The Benefits Of Microcurrent

The Energetic Theory of Aging links decreased levels of cellular energy, and lowered Adenosine Triphosphate production, to an acceleration in premature aging. Microcurrent is a safe, effective and non-invasive technology that mirrors the body's own electrical signature to dramatically contour the facial landscape.

- Regular application of True Microcurrent helps visually lift the facial landscape, leaving it plumped, hydrated and firmed.
- Studies also show that microcurrent stimulates the production of ATP (Adenosine Triphosphate), the molecule that powers key cellular functions, including the synthesis of collagen and elastin.*
- The unique combination of kinesthetic lifting with microcurrent, the Bio-Therapeutic signature approach, provides superior results in the appearance of the facial landscape, without the need for invasive services.

*Cheng, et al. 1982

Single handedly the perfect lift.

The patent pending K4iTEK™ technology of the bt-sculpt self tensioning probe system usher in a new era of results by delivering the optimum level of facial lifting with just one hand. The lower probes feature a unique spring system that provides just the right amount of assisted lift for an anatomically optimized service.

Four, three, two, one... contact!

Each of the four probes are machine crafted from surgical quality stainless steel, with a uniquely distinct shape and precision matte finish to ensure perfect skin contact and tension during the service for exceptional coverage and lifting.

Technology accelerate your regimen at the press of a button

The bt-sculpt's advanced control panel is simple to operate, and feature one button access to two powerful Suzuki Sequencing programs that are nearly fifty years in the making. Choose from LIFT, for unsurpassed one handed facial lifting, or SKIN for the advanced skinwork and paired application of your favorite serums and targeted solutions. Easy to read contact feedback indicators ensure proper skin contact, while a rechargeable battery and IPX5 resistance deliver excellent durability.

Why True Microcurrent?

The Suzuki Sequencing Difference

True Microcurrent represents the gold standard in microcurrent facial lifting by ensuring that the amount of current introduced to the skin is always in the optimal, efficacious output zone and that the frequency shape is optimized for the desired result.

Suzuki Sequencing features a specific, clean wavelshape that's computer calibrated over 1,024 times every second to ensure that the perfect frequency is being delivered to the skin at all times.

Competitor

 Bio-Therapeutic
TECHNOLOGY ACCELERATED SKIN CARE

Competitor

The bt-sculpt features two unique channels across four energy pathways for superior coverage of the skin with every pass. Plus, the interaction of the two channels results in an interferential canvassing effect that creates unique, nuanced wavelshapes and frequencies in real time. This dramatic increase in coverage and wavelshape sophistication compared to single channel units truly sets Bio-Therapeutic microcurrent apart.

Suzuki Sequencing delivers results that you can see after one service, as well as cumulative benefits over time.

The Technology Pioneers

Bio-Therapeutic has led the professional skin care industry in advanced technologies for nearly fifty years, starting with its pioneering work in microcurrent – a foundational technology for facial lifting and toning that continues to lead the industry. Bio-Therapeutic is headquartered in Seattle, Washington, USA, and all Bio-Therapeutic technology is designed, engineered and quality tested at its FDA registered, ISO-9001, ISO-13485 medical device manufacturing facility.

Bio-Therapeutic. Technology accelerated skin care.

The bt-sculpt is intended to stimulate the face. The device is for over the counter cosmetic use. The bt-sculpt is not intended in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease. Items may vary without notice and are not available in all countries.
